

Investment Objective

The objective of the Fund is to provide income and capital growth. The Fund will primarily invest in investment grade (those rated in one of the four highest categories by a recognised rating agency) fixed income debt securities (such as bonds) issued by companies globally as well as government related and mortgage and asset-backed securities (a security that derives its value from mortgages or other assets). The Fund is suitable for investors seeking income and long term capital preservation.

Fees

Investment management and administration fees have not been included in the performance figures and would have the effect of reducing the performance figures shown. Please check the investment section of your scheme booklet for details on these charges.

The data refers to past performance. Past performance does not predict future returns.

Performance: monthly Fund returns are based on the percentage change in the net asset value per share, after adjusting those values to include any reinvestment of dividends, interest and capital gain distributions. Monthly returns are linked geometrically to determine quarterly and annual returns. Gross returns are calculated by adjusting the monthly net return to exclude Administration, Trust and Custody fees. Fees would reduce the returns shown. Standardised Performance: Performance figures are shown on a mid-to-mid basis, inclusive of any net reinvested income and net of the annual management charge and all other fund expenses.

Portfolio Characteristics	
Average S&P Rating	A+
Number of Holdings	2280
Yield to Maturity	4.84

Yield to Maturity: the rate of return anticipated on a bond if it is held to maturity without defaulting. The calculation also assumes that all coupon payments are reinvested at the same rate as the bond's current yield.

Credit Quality: the likelihood that a bond will make all scheduled payments without defaulting. Bonds rated AAA are considered to have the highest credit quality and most likely to make all scheduled payments. Bonds rated BB and below are considered non-investment grade and are more likely to default.

Principal Risk

- A decline in the credit quality, or perceived credit quality, of an issuer could cause the value of investments held by the Fund to decline. Also, the issuer of an investment held by the Fund may not meet its payment obligations.
- Increases in interest rates are likely to cause the value of bonds or similar assets held by the Fund to decline in value.
- Derivatives can amplify share price volatility by increasing the Fund's sensitivity to underlying risks such as market, interest rate and credit. Derivatives may expose the Fund to credit risks of counterparties, who may not meet payment obligations. Volatility from derivatives may cause the Fund to liquidate portfolio positions when it would not be advantageous to do so.
- Fund assets in currencies other than the base currency of the Fund may expose the Fund to loss if the currency of those assets falls in value relative to the base currency.
- For further details of the risks, please refer to the Fund's prospectus.

Important Information

On 15 October 2009, the Investment Objective of the Fund was amended. Benchmark performance prior to 1 November 2009 is that of the prior benchmark, the Bloomberg Global Aggregate Index. **This is a marketing communication.** The factsheet has been produced by SEI Investments (Europe) Ltd, 1st Floor, Alphabeta, 14-18 Finsbury Square, London EC2A 1BR which is authorised and regulated by the Financial Conduct Authority.
