

Fund Objective

The Sub-Fund aims to track the Bloomberg Sterling Aggregate 100 mm Non Gilts Index, or its recognised replacement or equivalent.

Investment Strategy

The Sub-Fund primarily invests in a sample of securities constituting the Index, but other investments may also be held including securities that are not in the Index. Bond futures can be used for efficient portfolio management.

Controversies and controversial weapons are excluded by the manager from the Sub-Fund using the manager's screening methodology.

Past performance is not a guarantee of future results. Investing involves risk including the risk of loss of capital.

Performance returns for periods of less than one year are not annualised.

Returns are gross of fees (based on unit price) and net of irrecoverable withholding tax.

The index returns are unmanaged and do not reflect the deduction of any fees or expenses. The index returns reflect all items of income, gain and loss and the reinvestment of dividends and other income. The performance includes the reinvestment of dividends and other corporate earnings and is calculated in GBP.

Please note the historic index returns for a number of benchmarks have been restated by FTSE. The historic benchmark index returns contained within this factsheet are the restated historic benchmark index returns. The fund's returns are unaffected by this restatement.

The calculation method for value added returns may show rounding differences.

When the Fund is closed according to its official Net Asset Value (NAV) calendar but, nonetheless, a significant portion of the underlying security prices can be determined, a Technical NAV is calculated. Past Performance indicated herein has therefore been calculated using a Technical NAV when required, as well as the official NAV of the Fund as at each other business day for the relevant period.

Any spreads disclosed are indicative only and are subject to the discretion of the investment manager, based on market conditions at the time of transaction.

Previous to 19 November 2020, the Fund was known as Sterling Non-Gilts Bond All Stocks Index Sub-Fund. Previous to 1 December 2021, this Fund's Benchmark was the Bloomberg Barclays Sterling Aggregate 100 MM Non Gilts.

Investing in the Managed Pension Fund is effected by means of an insurance policy written by Managed Pension Funds Limited, a member of the State Street group of companies. This document should not be construed as an invitation or inducement to engage in investment activity. The Managed Pension Fund is available to pension schemes (including overseas schemes) registered with HM Revenue and Customs for the purposes of Chapter 2 of Part IV of the Finance Act 2004. This document should therefore only be circulated to the Trustees of such schemes and their advisers who are deemed to be professional persons (this includes professional clients and eligible counter parties as defined by the Financial Conduct Authority). It should not be circulated to or relied upon by any other persons. In particular scheme members should consult with their employer or scheme trustee. Please note that neither State Street Global Advisors Limited or Managed Pension Funds Limited offer actuarial services and any investment service undertaken by those firms with an objective of matching projected pension fund liabilities does not include, or take responsibility for, the calculation of projected liabilities. Any illustrations exclude the impact of fees, and actual investment returns may differ from projected cashflows, these projected cashflows are not projections of any future benefit payable under a specific policy.

TER Max represents the fund's aggregate operating and management fees excluding transaction costs. Transaction costs are billed separately to the fund.

If your account holds Russian securities and instruments, then as of the date of this publication, they have been fair valued. Such fair value may be zero. If your portfolio holds such Russian securities and instruments, then the portfolio may not be able to dispose of such securities and instruments depending on the relevant market, applicable sanctions requirements, and/or Russian capital controls or other counter measures. In such circumstances, the portfolio would continue to own and have exposure to Russian-related issuers and markets. Please refer to your portfolio holdings report.

Glossary:**Effective Convexity**

A measure of the curvature in the relationship between bond prices and bond yields that demonstrates how the duration of a bond changes as the interest rate changes.

Effective Duration

A duration calculation for bonds that have embedded options. This measure of duration takes into account the fact that expected cash flows will fluctuate as interest rates change. Effective duration can be estimated using modified duration if a bond with embedded options behaves like an option-free bond.

Yield to Maturity

The total return anticipated on a bond if the bond is held until it matures. Yield to maturity is considered a long-term bond yield, but is expressed as an annual rate. In other words, it is the internal rate of return (IRR) of an investment in a bond if the investor holds the bond until maturity and if all payments are made as scheduled.

Distribution Yield

The Annual dividends per share (DPS) of the fund divided by the share price of the fund.

Delta

A measure of equity sensitivity showing the relationship between a percent change in stock price and corresponding expected percent change in convertible price; it is also known as price elasticity.

TER

Total Expense Ratio is a fee charged to the fund, as a percentage of the Net Asset Value, to cover costs associated with operation and management of the portfolio of assets.
